CARDBOARD SHREDDER HSM PROFIPACK P425

This robust and high-performance cardboard shredder is used to process a number of layers of cardboard into a padding mat or padded filling material. The professional device is mobile on steering rollers and can be used with total flexibility. Cardboard shredder HSM ProfiPack P425 can be used for all shipping and storage areas, in production and distribution centers. It perforates used cardboard to make universally usable packaging material that is as good as new. This saves costs and at the same time, is a sensible and practical contribution to environmental protection.

- “Made in Germany” quality - The high-quality materials and proven HSM “Made in Germany” quality guarantee you are receiving a safe and durable machine.
- Very powerful, free-standing device, the perfect addition to your packing table or warehouse
- Inlet height: 20 mm
- Dimensions: W 700 x D 480 x H 970 mm
- Cutting speed: 13m / min.
- Motor power: 1.4 KW
- Cutting performance in layers: 2-3 layers
- Voltage / frequency: 230 V / 50 Hz
- Weight: 170 kg

With this practical HSM cardboard shredder ProfiPack P425, you can shred up to 3 layers of cardboard and paper. On the one hand, you destroy your old cardboard boxes on the other hand you can quickly and easily produce upholstery and filling materials. So you save twice! The material produced is ideal for packing sensitive and heavy objects or for filling cavities.

CARDBOARD SHREDDER HSM PROFIPACK P425 FEATURES

- Solid steel cutting rollers - The induction-hardened, solid steel cutting rollers can easily cope with staples and paper clips and guarantee durability.
- Variable cushioning volume - Depending on the application, the cushioning volume of the packaging material can be adjusted as required.
- Adjustable working width as required - The infinitely variable adjustment of the working width with a scale allows the production of cushioning material exactly as required.
- Intuitive controls - The intuitive operator control panel with LED indicators on a robust keypad signals the operating status of the device.
- Castors with parking brake - The device can be used on a mobile basis and has smooth-running, stable castors with a parking brake
- Cutting rollers made of hardened solid steel
- Powerful, efficient drive concept allows continuous operation
- Particularly sustainable operation due to the high efficiency
- Fully flexible feed-in speed adjustment
- The adjustable cushioning volume of the packaging material
- Infinitely adjustable working width with scale for cushioning material made to measure
- Intuitive operation with LED indicators on a robust keypad
- Integrated turbo-function resolves blockages
- User safety through emergency off switch
- Mobile on castors, with the parking brake

- When the emergency stop switch is actuated, the device stops immediately.

CARDBOARD SHREDDER HSM PROFIPACK P425 SPECS

Model	Cardboard shredder HSM ProfiPack P425
Grid dimension	5 x 100 mm
Cutting capacity	Up to 3 positions
Operating speed	8.5 – 14.0 m/min
Working width	425 mm
Infeed height	20 mm
Power supply	230 V, 50 Hz 120 V / 60 Hz 220 V / 60 Hz
Operating mode	Continuous operation
Motor power max.	1.4 kW
Ambient conditions for transport, storage, and operation:	
Temperature	-10 °C up to +25 °C
Relative humidity	max. 90%, non-condensing
Noise emission	60 – 62 dB(A)
(idle / under load)	66 – 67 dB(A)
Size W x D x H (mm)	770 x 570 x 1040
Weight	170 kg

HOW DOES CARDBOARD SHREDDER HSM PROFIPACK P425 WORK

1. Switch the Cardboard shredder HSM ProfiPack P425 on
 1. Unlock the emergency stop button by turning it anti-clockwise
 2. Move the power switch at the right-hand side to position “I”.
 3. “Ready for operation” display flashes. The “Ready for operation” display illuminates constantly after a short period of time. The machine is ready to operate. Press the “Forward button”. The cutting unit starts up.
 4. The operating speed can be controlled in 4 levels using the - and + adjustment buttons. Changing the settings during operation is possible.
2. Feed-in cardboard
 1. Put the cardboard in the machine. Cardboard is processed at a width of up to 425 mm.
 2. Wider cardboard is automatically trimmed.
 3. The cutting unit is switched off using the stop button.
3. Switch off
 1. Switch the mains switch on the right side to position “0”.
