

ECOBAND-S PAPER & OPP BANDING MACHINE 12MM

- **Interactive Touch Screen** to simplify adjustments
- **Automatic induction packaging** and **pedal sensing packaging**
- The packing speed is **26 passes/min**
- **Tightening strength is adjustable** to ensure the tightening is appropriate and not loose – Adjustable binding force up to 5kg
- **Arch size** of the paper banding machine is **W220 x H170mm**
- Can be used with **OPP tape** and a **paper strap**
- Automatic strapping machine **only takes 1.5s to strap** the material

ECOBAND-S PAPER & OPP BANDING MACHINE

ECOBAND-S automatic banding machine for OPP tape and paper tape is widely used for gentle strapping of soft and sensitive items, eg.: banknotes, labels, envelopes, CDs, medicines, business cards, luxury prints, etc. ECOBAND-S automatic OPP banding machine has a high packing speed (26straps/min) and adjustable binding force up to 5 kg. The function of this machine is to use plastic OPP tape or paper tape to grid the product or products together, it is suitable to work with auto cutting or packing machine. Instead of using the rubber band to tie the products, it takes only 1,5 seconds to bundle the products through the OPP tape or paper tape for easy packaging. Arch size of the paper banding machine is W220xH170mm and the machine weighs 18kg.

ECOBAND-S OPP film packing machine will help you efficiently bundle small products or packaging. There are many reasons in favor of banding your products. On the one hand, the bundling of your goods according to the number of items simplifies in sales description, on the other hand, it enables the grouping of packaging units, such as product sets. At the same time, the bundling of packaging offers protection against theft. Last but not least, banding helps to reduce waste because it replaces conventional blister packaging.

The banding machine bundles small packages or products with OPP paper tape. The tape is securely closed with a thermal seal. The tension of the banderole can be precisely regulated and thus also guarantees gentle bundling of sensitive products. The machine does not take up much space because it can be used as a tabletop device with a small footprint. In addition, manual or automatic operation is extremely easy, because simply inserting the products is sufficient. The end stop for guiding the products is flexibly adjustable and also removable. So you can use the machine for very long products.

ADVANTAGES OF ECOBAND-S PAPER & OPP BANDING

MACHINE:

- Automatic strapping machine only takes 1.5s to strap material
- With 2 kinds of control modes, it can use automatic induction packaging and pedal sensing packaging to facilitate the production line.
- Soft and gentle tightening
- Automatic welding and cutting of the strap
- PCB control panel with touch display
- Compact design
- Microelectronic line control, reliable performance
- Adjustable tightening force to meet the different needs
- The whole machine is small and beautiful
- A variety of bundled forms: single, double, cross, easy to operate

FEATURES OF ECOBAND-S PAPER & OPP BANDING MACHINE

- Automatic induction packaging and pedal sensing packaging
- The packing speed is 26 passes/min
- Tightening strength is adjustable to ensure the tightening is appropriate and not loose – Adjustable binding force up to 5kg
- Intelligent strapping function, can strapping material continuously, fast and high working efficiency
- Easy to replace straps, good for strapping different materials
- Intelligent operation panel with touch screen, make the machine easy to operate and environmentally friendly

ECOBAND-S PAPER & OPP BANDING MACHINE SPECIFICATIONS

Model	ECOBAND-S
Power supply	AC110V / 220V, 50-60Hz
Packing speed	26 passes/min
Pantograph size	W220xH170mm
Binding force	< = 5kg
Working table height	215mm
Binding band	Paper & OPP film tape
Bandwidth	12mm
Coil inner diameter	40mm
Coil outer diameter	160mm
Coil thickness	0.12mm
Minimum packing object	30mm width
Machine size	L380xW280xH415mm
Weight	18kg
