## SMITH POWERED PALLET TRUCK WALKIE - LI-ION BATTERY - 1500KG 200MM

**SMITH Powered pallet truck Walkie** is a Walkie type motorized pallet truck. It adopts an advanced structure such as a ring rod lifting system and DC controller, at the same time it is equipped with a **high-quality motor, lithium battery, and pump station motor**. This motorized pallet truck is designed to be used with two hands and it is the most affordable in this category of electric pump trucks. It has the characteristics of superior performance, **convenient operation, flexible steering, reliable braking**, good dynamic performance, **less noise, less pollution**, and a beautiful appearance. This series truck is suitable for working on the smooth ground in the warehouse. Powered pallet truck Walkie can be used for lifting up heavy objects and pallets to about 200mm high and transporting them to the new location. The electric pump truck is an affordable, lightweight, and powerful pallet truck to have around. The **powered pallet truck** can lift various objects and pallets and is highly customizable. The electric pallet truck has two motors. One is for driving and one is for lifting. Both motors have a power of **24V/0.75KW**. This motorized pallet truck comes with a **Li-ion battery 24V/30 Ah** and a **charger**. The battery is very powerful and allows you to use an electric pump truck for several hours without recharging. Recharging is very fast, therefore, you will not waste time waiting. The maneuverability and ease of operation with this motorized pallet truck will allow you to use it for lifting pallets or heavy objects approximately **200mm** high from the ground and putting them to the new location. Electric pump truck SMITH Walkie is designed in a way that can be easily operated and it doesn't use a lot of space. **It has a 12-month warranty and service is available only in the European Union.**

## SMITH POWERED PALLET TRUCK WALKIE SPECIFICATION:

Model	SMITH Powered pallet truck Walkie	
Drive type	ELECTRIC	
Manner of operation	Walkie	
Load Capacity	1500	kg
Load Centre	600	c (mm)
Distance between fork backrest and front wheel	944	x (mm)
Wheel Base	1243	y (mm)
Service Weight□with battery□	142	kg
Tire material	PU	
Driving wheel size	Φ210×70	Φ×w(mm)
Balance wheel size	Φ80×60	Φ×w(mm)
Qty of wheel□Front/Rear□x=driving wheel□	1x/4	
Tread	400	mm
Lifting Height	200	mm
The height of handle in the operation position	740	mm
Lowered fork height	85	mm
Overall Length	1603	mm

Body Length	453	mm
Overall Width	550	mm
Fork Size	50/150/1150	s/e/l (mm)
Fork Width	550	mm
Ground clearance under mast	35	mm
Aisle width for pallets 1000*1200 crossways	1804	mm
Aisle width for pallets 1000*1200 lengthways	1854	mm
Turning Radius	1398	mm
Driving Speed, load/unload	4.2/4.5	km/h
Maximum gradeability load/unload	5/10	%
Brake Type	Electromagnetic brake	
Drive Motor	0.75	kW
Lift Motor	0.75	kW
Battery voltage/rate capacity	24/30	V/Ah
Battery Weight $\pm 5\%$	7.8	kg
Type of drive control	DC	
Noise level	$\leq 70$	dB(A)
Steering type	Manual steering system	

#### ADVANTAGES OF ELECTRIC PUMP TRUCK SMITH:

- Ring rod lifting system and DC controller
- **Li-ion battery 24V/30 Ah** and a **charger**
- Convenient operation, **flexible steering**, and **reliable braking system**
- Good dynamic performance, **less noise**, **less pollution**, and beautiful appearance
- The electrical system includes walking and operation control. The truck use DC electric control assembly.
- The meter has a battery indicator

#### WHAT IS THE PRICE OF THE ELECTRIC PUMP TRUCK SMITH?
